

Permanent Displays

Case Study

- Project:** Dump bin display
- Problem:** Regular corrugated floor displays lose their integrity after the first time a wet floor mop brushes against them. Costs increase as replacement displays are re-ordered.
- Solution:** By constructing this floor dump bin out of styrene and fluted polypropylene (coroplast), we have created a long-lasting (no replacements necessary), attractive and cost-effective display which helps drive impulse sales.
- Duration:** Permanent
- Processes:** Production design, prototyping, UV screen printing, die-cutting, warehousing and fulfillment.
- Substrates:** 40 mil styrene: header & 2-pc. body
4 mm fluted polypropylene: false floor, bin compartment dividers, floor supports
plastic: Viking clip fasteners

Let our vision . . . become your solution !

uv printing

- In-Store Signage
- Specialty Inks
- On-Vehicle Signage
- Consumer Packaged Goods
